

# Alta Log Homes Premium Materials Package

1. Air dried, precision milled, eastern white pine logs.
2. Pre-cut, lettered and notched logs for faster and easier assembly (no guesswork on home site.)
3. Superior double-locking tongue and groove construction with modified saddlenotch for structural strength and thermally tight fit.
4. Post & Beam ceilings in most models.
5. Prefab Trusses (dimensional lumber) where specified.
6. Custom Architectural appearance grade laminated beams where specified.
7. Pre-cut roof rafters for exposed beam ceilings (4"x8" or 4"x10") and rafter straps.
8. Pre-cut ceiling beams for exposed beam second floor w/ metal hangers.
9. Porch posts, girders and rafters where applicable.
10. Tongue & groove 2"x6" decking for post and beam ceilings, loft, and porch where applicable.
11. Therma-Tru Fiber-Classic or Classic Craft exterior entry doors w/ interior and exterior trim and stiffeners.
12. Andersen® 400 Series High Performance™ Low E-4™ series casement and/or awning windows w/screens and interior and exterior trim, blocking and stiffeners (grilles optional).
13. Andersen Flexi-Frame specialty windows with interior & exterior trim where specified e.g. trapezoids.
14. Andersen 400 Series Frenchwood Hinged or Gliding Patio Doors w/screens and interior and exterior trim, blocking and stiffeners.

15. Pre-cut log gables where specified.
16. Prefab frame gables. Cedar shingles or log siding for exterior only where specified.
17. Cedar shingles or log siding for all dormers (exterior only).
18. Alta-Max Log screw fasteners for efficient and secure assembly of logs.
19. Alta-Flex sealant for all log, window, and door connections to create energy efficient shell.
20. Complete set of blueprints and log plan diagrams. (Engineer's seal available at extra cost for certain states.)
21. Optional stain available for interior or exterior. Please choose colors with your dealer.
22. Low compression foam sealant and gasket tape for specific areas to seal gaps and save energy.
23. Post/Stiffeners w/lag screws and washers. Foam closure to minimize sound transfer behind post/stiffeners.
24. Plywood splines for butt joints in log.
25. Box sill siding and log ends to finish off floor system appearance.
26. Acoustical pads & low compression foam for enhanced sound absorption
